IDENTIFIERS American College Test; *Kentucky

ABSTRACT

This document contains 33 tables of statistical data which describe aspects of enrollment, instructional programs, financial support, and student characteristics in Kentucky's community colleges during 1975-76. Total headcount enrollment was 17,362 in fall 1975, an increase of 27% over that of fall 1974. Of the total enrollment, 79% of the students were freshmen and 21% were sophomores, 52% were male, and 83% were Caucasian. First-time freshmen accounted for 31% of the total enrollment and 39% of the freshman enrollment. Analysis of enrollment by degree programs showed that 39.3% of the students were enrolled in transfer programs leading to a baccalaureate degree, 51.6% were enrolled in programs leading to the Associate in Applied Science degree, and 9.1% had no degree objective. Degrees attained by the 408 full-time faculty included 75% with master's degrees, 9% with doctorates, and 17% with bachelor's degrees or less. While Kentucky community colleges potentially receive revenues from local tax support and student fees, only state revenues were actually available for educational expenditure in 1975/76. Average expenditure per full-time equivalent student was $1,014. The mean composite ACT (American College Test) score for all entering freshmen was 15.6, compared to 17.0 in 1974, and represented the lowest mean score for the nine years studied. (JDS)

DEVELOPMENT OF THE COMMUNITY COLLEGE SYSTEM

In 1962 the General Assembly of Kentucky, through the leadership of Governor Bert T. Combs, enacted legislation mandating the formation of a system of community colleges and entrusted the Board of Trustees of the University of Kentucky with the operation of such a system. At the same time, the legislature recommended five sites for future colleges.

The two factors responsible for the operation of the system being given to the University of Kentucky Board of Trustees were first, the recognition that as the governing board of the state's land grant university, the University of Kentucky Board of Trustees already had responsibility for the planning and operation of state-wide programs and secondly, recognition of the existence of the five extension centers then being operated by the University of Kentucky. Between 1948 and 1962, the University of Kentucky had opened four extension centers at Covington, Cumberland, Fort Knox, and Henderson, and assumed the responsibility of the municipally run Ashland Junior College.

In creating a system of community colleges, the 1962 General Assembly abandoned the extension center philosophy of the program then operated by the University of Kentucky and committed the state to a comprehensive community college program. A three-fold function of career-oriented technical programs, pre-baccalaureate education, a d adult-continuing

education was called for in the enabling legislation.

In July 1964, the University of Kentucky, guided by the leadership of its sixth president, Dr. John W. Oswald, provided for both the operation of a University System and a Community College System under the Board of Trustees. The Community College System operates as an autonomous system with the determination and administration of its academic programs being separate from that of the University System. The chief administrative officer of the Community College System is the Vice President for the Community College System, who is directly responsible to the President of the University.

Also, in 1964, new community colleges opened at Elizabethtown and Prestonsburg, bringing the total number of campuses under the new system to seven. Total enrollment that fall was 2,876 students; an increase of 67 percent over the previous year.

The Community College System continued its growth in all respects after 1964. After studies in 1965 and 1967 regarding the need for additional community colleges, recommendations concerning criteria to be used in establishing new community colleges were made to the University of Kentucky Board of Trustees. These criteria were adopted by the Board and submitted to the Council on Public Higher Education - the state's coordinating and planning body for public institutions of higher education. Acting on the Council's recommendation, the General Assembly amended the Community College Act to recognize the Lexington Technical Institute, which had been

operating on the University campus since August 30, 1965; and to authorize new community colleges at Louisville and Maysville in 1966, one at Hazard in 1967, and the last one at Madisonville in 1968. These latter four units were subsequently established and opened for students in 1968.

In July 1968, Paducah Junior College, a municipally-operated college founded in the 1930's, joined the Community College System as Paducah Community College. This brought to fifteen the number of units then operating under the University of Kentucky Board of Trustees.

In January 1970, the General Assembly of Kentucky, recognizing the need for additional higher education opportunities in the Northern Kentucky area, authorized the creation of a new four-year state college, Northern Kentucky State College. The facilities of the Northern Community College, operated since 1948 by the University of Kentucky were, as of July 1, 1970, transferred to the administrative control of the newly-formed Northern Kentucky State College. This reduced to fourteen the number of units operating under the University of Kentucky Community College System.

Effective with the 1972 Fall Semester, the Fort Knox Community College was changed to a four-year residence instruction center and assigned to the administrative control of the University of Kentucky Vice President for Academic Affairs. Also in the Fall 1972, two sub-units began operation: one associated with Jefferson Community College and the other

with Hopkinsville Community College. The Southwest Campus of Jefferson Community College was opened in response to the request for more educational opportunities made by the citizens of the Southwest section of Jefferson County. The operation is temporarily housed in a high school operating in the evening hours and serving primarily part-time students. The second sub-unit is Eagle University, located at Ft. Campbell, Kentucky. Eagle University is a consortium of several institutions of higher learning including Hopkinsville Community College which offers educational programs on the military base at Ft. Campbell.

In 1968 the General Assembly authorized the establishment of two additional community colleges, at Glasgow and Carrollton; however, funds have not yet been appropriated for their activation.

SECTION I

ENROLLMENT

The number of students enrolled in the University of Kentucky Community College System during the 1975 Fall Semester is presented in Tables 1 through 3, and an enrollment history is presented in Tables 4 and 5.

The total head count credit enrollment of 17,362 students is shown in Table 1 for the thirteen community colleges operating during the Fall of 1975. This enrollment represented a significant numerical increase of 3,690 and a percentage increase of 27% over the Fall of 1974. In comparison, the numerical increase in 1974 was 730 and the percentage increase over the Fall of 1973 was 5.6%. Of the total enrollment 13,745 were freshmen (79%) and 3,617 (21%) were sophomores. The ratio of freshmen to sophomores remained relatively unchanged from the previous four years and is typical of most community colleges, in that the retention rate of sophomores is generally low. Fifty-three percent of the freshmen and 61 percent of the sophomores were enrolled as full-time students. In 1974, 53 percent of the freshmen and 63 percent of the sophomores were full-time students.

The number of men and women enrolled is shown in Table 2. Of the students enrolled 9,062 (52%) were men and 8,300 (48%) were women. Fifty-four percent of the men were enrolled as

full-time students, while 55 percent of the women were enrolled on a full-time basis. This was a slight decrease for men from 1974, when 56 percent were enrolled full-time. Since 1971, the percentage of full-time male and female enrollments has been declining even though the actual numbers have been increasing.

The number of students enrolled in the Community College System by place of residence is shown in Table 3. In 1975, only 236 were non-residents of Kentucky. This means that 98 percent of those students receiving credit instruction in the 1975 Fall Semester were Kentucky residents.

Enrollment History

Tables 4 through 6 present a history of enrollment in the University of Kentucky Community College System. Table 4 shows the head count enrollment since 1964, while Table 5 provides similar information about the full-time equivalent enrollment. Table 6 indicates the number of first-time freshmen enrollees since 1965.

Since 1964 when the System was created, credit enrollment has increased from 2,876 students in seven colleges to 17,362 students in thirteen institutions. In ten years, this has meant a numerical increase of 14,486 students and a percentage increase of 504. Over 90 percent of this growth has occurred in the eight colleges started after 1964 and the five remaining original colleges now account for only 25 percent (4,309 students) of the total enrollment as of Fall, 1975. Jefferson

Community College now accounts for 35 percent of the total enrollment in the System.

Table 5 indicates the full-time equivalent credit enrollment for the period 1964-1975. The full-time equivalent (FTE) computation is based on the total credit hours for which students are enrolled, divided by 15. Prior to 1973, however, the ratio was 16 to 1. The total FTE credit enrollment for the Fall of 1975 was 11,514. This is a numerical increase of 2,251 over the Fall of 1974 enrollment and represents a percentage increase of 24. Since 1964, the FTE credit enrollment of the Community College System, calculated on a 15:1 ratio, has increased from 2,084 to 11,514, a growth of 452 percent.

First-time freshmen enrollment, as seen in Table 6, accounted for 31 percent of the total enrollment and represented 39 percent of the freshmen enrollment of 13,745 for the Fall of 1975. Since 1965, the percentage of first-time freshmen in relation to the total enrollment has ranged from a low of 29.4 in 1973 to a high of 40.6 in 1968. The mean percentage for the period from 1965 to 1975 is 35.5 percent.

SECTION II

INSTRUCTIONAL PROGRAMS

The University of Kentucky Community College System is committed to the development of a comprehensive educational program with emphasis upon two-year technical and semi-professional programs which prepare for job entry. Information relating to the distribution of enrollment is provided in Tables 7 through 16. The number of graduates in these programs is detailed in Tables 17 through 19. Table 20 provides information pertaining to the library holdings which support the instructional programs. An analysis of the degrees held by the full-time teaching faculty is found in Table 21.

An analysis of the headcount enrollment by degree programs is shown in Tables 7 through 10. As shown in Table 7, 6,819 (39.3%) of the students are in transfer programs which will lead to a baccalaureate degree while 8,963 (51.6%) are enrolled in programs which lead to an Associate in Applied Science degree. The remaining 1,580 (9.1%) are mostly part-time students who have no degree objective. Of the students enrolled in the baccalaureate programs 64.8% (4,416) are full-time while in the Associate in Applied Science programs 55.5% (4,974) of the enrollment is full-time.

Table 8 provides information on the change in enrollment between 1974 and 1975. The non-degree enrollment is included in the figures for the applied science degree enrollment for both years. There was an increase in baccalaureate enrollment at all institutions except Ashland, Hazard, Henderson, and Southeast. All of the colleges, however, experienced increases in Applied Science degree enrollment. The percent of change in baccalaureate enrollment ranged from an increase of 93.4 percent in the Eagle University Program operated at Ft. Campbell by Hopkinsville Community College, to a decrease of 32.4 percent at Southeast Community College. The percent of change in applied science degree enrollment ranged from an increase of 94.4 percent in the Eagle University program to a low of 7.3 percent at Southeast Community College. System-wide there was an increase of 18.1 percent in baccalaureate enrollment and an increase of 34.1 percent in applied science degree enrollment. The percentage of students enrolled in applied science degree programs, 58.5% in 1975 compared to 55.4% in 1974, continues a trend which began in 1971 when enrollment in the baccalaureate degree programs accounted for 68 percent of the students.

Of the students pursuing a baccalaureate degree, 4,441 (65.0%) are men and 2,378 are women. A comparison of Tables 9 and 10 indicates that on a percentage basis, more men are enrolled in the baccalaureate programs than in applied science programs. The number of baccalaureate level students who are men has increased 15.6 percent over 1974 and the number of women students has increased 5.5 percent. Of the 10,543 students in

the applied science programs, 4,720 (44.8%) are men and 5,823 (55.2%) are women.

The credit hour production by degree level is shown in Table 11 and the full-time equivalent enrollment is presented in Table 12. The FTE enrollment is computed by dividing the number of credit hours by 15. Of the 11,514 FTE students, 5,224 (45.4%) are in the baccalaureate programs while 5,820 (50.5%) are in applied science programs and 470 (4.1%) are non-degree. The difference between the percentage ratios of baccalaureate and applied science enrollment by headcount (Table 7) and full-time equivalent (Table 12) is partially explained by the greater number of part-time students in the applied science programs.

Tables 13 through 15 provide information on the enrollment by course level as differentiated from student degree level. As seen in Table 14, the full-time equivalent enrollment is 8,152 in baccalaureate level courses and 3,362 in applied science level courses. This is due primarily to the fact that approximately one-half of the course work in the applied science degree programs consists of general education courses which are reflected in the baccalaureate course enrollment.

Table 16 contains a summary of the head-count enrollment in continuing education activities and the number of continuing education units awarded by the community colleges during the 1974-75 year. Total enrollment in formal, short courses and organized programs was 9,605 students. Of this number, 3,417 (35.6%) were enrolled in programs for which individual continuing education units were awarded.

Analyses of graduates of the University of Kentucky Community College System are shown in Tables 17 through 19. Associate degrees are awarded to students who successfully complete with at least a "C" average one of the specified curricula, all of which require at least 60 semester hours. The Associate in Applied Science Degree is awarded to students successfully completing career-oriented programs. These programs are intended to lead to immediate technical or semi-professional employment. Table 17 indicates that of the 1,675 students who received an associate degree during the 1974-75 academic year, 786 (46.9%) were in the baccalaureate programs while 889 (53.1%) were in applied science programs.

The program areas in which the Associate in Applied Science Degrees were awarded are shown in Table 18. There were graduates from thirty-nine of the forty-three applied science programs offered in the Community College System. Of the applied science degrees, 348 (39.1%) were in Nursing and 125 (14.1%) in Secretarial Science. The number of nursing graduates decreased by 43 from 1973-74. In terms of the broad curriculum areas, the Allied Health area dominated with 449 (50.5%) of the degrees.

A history of the number of degrees and certificates awarded in the University of Kentucky Community College System from 1972 through 1975 is presented in Table 19. The Community College System has discontinued the Certificate of College Studies. The Certificate was last awarded in 1974. Effective with the 1975 graduation the requirements of the Associate in Arts and Associate in Science degrees have been reduced to a minimum of sixty hours.

Table 20 presents information relating to the number and type of library materials supporting the instructional programs. Increases in non-print units were reported by the colleges for 1974-75. A number of the colleges are developing sizable collections of microfilm and other microform and non-print units.

An indication of the educational level of the full-time teaching faculty is shown in Table 21. Of the 408 faculty members, the majority 308 (75%) have a Masters Degree while 33 (9%) have a Doctorate and 69 (17%) have a Bachelors or less.

SECTION III

FINANCIAL SUPPORT

An analysis of information concerning the financial support of the University of Kentucky Community College System is presented in Tables 22 through 26. Nationally, community/junior colleges have three major sources of revenue - local tax support, student fees, and state support - for operational funds. The University of Kentucky Community College System, however, is almost completely supported by appropriations of the state legislature. While two of the colleges do have the benefit of local tax support, this income has been committed for site acquisition in the case of Ashland Community College and for program enrichment at Paducah Community College. Only at Paducah do the funds actually provide operational funds. The student fees of $195.00 per semester for a full-time state resident and $490.00 for a full-time non-state resident have been pledged to retire an eighteen million dollar bond issue which is currently being used for construction projects throughout the System. Since these two sources of potential operating revenue are not provided for general educational purposes, the state appropriation becomes the major source of financial support for operating purposes.

The actual operating expenditures by major category for each community college for 1974-75 are shown in Table 22 and the percentage analysis by category is shown in Table 23. During 1974-75 $9,395,234 was expended in general educational funds for an FTE student enrollment of 9,268. This is an average expenditure of $1,014.00 per FTE student. The addition of auxiliary services and capitol construction funds brought the total expended to $10,332,374 for 1974-75.

A percentage analysis of the expenditures for general education purposes is shown in Table 23. The percentage expenditure for instruction ranges from a low of 49.6% at Hazard to a high of 81.7% at the Lexington Technical Institute.

Information on the budgeted operating expenditures for 1975-76 is shown in Tables 24 and 25. For 1975-76, a total of $10,164,018 was budgeted for general educational operational support. It should be noted that neither the Commonwealth of Kentucky not the University of Kentucky has a stated policy of a fixed dollar support per FTE student. Including the funds budgeted for capitol outlay and auxiliary services, the total budgeted expenditures for community college programs was $11,557,082 for 1975-76.

Two aspects of the Community College System general education expenditures are omitted from these tables: the first is the indirect administrative costs and fringe benefits for the Community College System within the University of Kentucky Lexington Campus budget. Certain administrative functions, in the business and fringe benefits area, are

handled for the System through the Lexington Campus. Cost estimates of this have been listed at $1,100,000 per year. In addition, debt service for the recent construction program for the community colleges is carried as a separate budget item. For 1974-75 the debt service was $1,428,800 and was budgeted at $1,430,100 for 1975-76. Taking these indirect costs into consideration would raise the average FTE expenditures to $1,269.00 for 1974-75.

Information concerning the average faculty salaries for each community college is shown in Table 26. The Community College System has only recently implemented a four level rank system and this is the second year individuals have appeared in all ranks. The average salaries do not include fringe benefits and are for a ten-month contract. Only teaching faculty are included in these figures which are prepared in accord with the national AAUP salary study. The figures in parenthesis indicate the number of faculty at that rank.

SECTION IV

STUDENT CHARACTERISTICS

An indication of the academic characteristics of first-time freshmen in the University of Kentucky Community College System is represented by the scores on the American College Test. The American College Test is required of all entering students who have no previous college work and are high school graduates, under 19 years of age. The ACT is a national achievement test which yields standard scores in the areas of English, mathematics, social sciences, natural science, and a composite score. It is used by all the public institutions of higher education in the state as a counseling and placement device. Students enrolled in technical degree programs or who are non-high school graduates over the age of 19 may take the ACT Career Planning Program instead of the American College Test. The ACT Career Planning Program is designed to help students relate their interests and abilities to educational and career planning.

The mean ACT standard scores for each of the four tests and the composite score for all entering students in the Fall 1975 is shown by college in Table 27. A total of 3,425 students were included in the results. The mean composite ACT score varies from a high of 17.3 at Paducah Community College to a low of 13.8 at Jefferson Community College. The mean composite of 15.6 for the System as a whole is lower

than the mean composite of 18.5 for the eight public senior institutions of higher education in the state. The differences between male and female students is shown in Table 28 and Table 29. The mean composite score is higher for men than women. A comparison of the mean scores for community college students since 1967 can be seen in Table 30. The composite mean for the System of 15.6 is the lowest for the nine year period reflecting the national trend toward lower scores.

Information concerning the estimated family income is found in Table 31. Four percent of the students in the System reported less than $3,000 annual income, while eight percent reported an annual income between $3,000 and $5,999. Thus, twelve percent reported incomes of $6,000 or below.

The ethnic background of the students enrolled in the Community College System is found in Table 32. The overwhelming majority of the students are Caucasian, 14,386 (83%) with the next largest ethnic group being Afro-American, 2,244 (13%). Since 1971 the Afro-American enrollment has increased from 6.6 percent to 13 percent of the total.

The distribution of full-time and part-time students by age groups is shown in Table 33. The 4,937 full-time students under 20 years of age comprise the largest category of students by age in the Community College System. However, there are 5,524 students age 26 or older. This further illustrates the atypical characteristics of community college students. There were 87 students age 65 or older, 65 of whom were enrolled at Hopkinsville Community College.
